RE: Letter of Permission (LOP) for Temporary Tents, Structures, Activities, and Placement of a Fireworks Display, Sea Island Beach Club, Sea Island, Atlantic Ocean, Glynn County, Georgia, (GPS 31.17842°N/-81.34838°W)

Dear Ms. Grogan:

This Letter of Permission (LOP) is in response to your request, received July 20, 2026, to erect temporary tents on the existing lawn and terrace at the Sea Island Beach Club for group and holiday events and to set up equipment for a New Year's Fireworks Display held by Sea Island Acquisition, LLC. All components of this request are within Shore Protection Act (SPA) jurisdiction and will begin no sooner than August 7, 2026, and be completed by February 6, 2027.

The temporary tents for the group and holiday events will be erected starting August 7, 2026, through February 6, 2027. According to your request, the tents will be located landward of the dunes, on the existing manicured masonry terrace and lawn at the Beach Club. Equipment required to deliver and assemble the tents includes a forklift, a one-ton pickup truck, a 24ft. enclosed trailer, and a flatbed trailer. Tent materials, including air conditioning equipment, will be delivered on pallets stored on a flatbed trailer. A forklift will off-load materials and equipment for assembly at the site. The approved DNR vehicle access route will be used for the transport of the approved equipment.

To accomplish the set-up for the New Year's Fireworks Display, an 8ft. x 16ft. fireworks launch trailer will be hauled onto the beach by a 4-wheel drive Jeep. The flatbed trailer will serve as the firework launch site and will be staged in an unvegetated area. An 8ft. x 10ft. lemonade stand by Sweet GA Sips and inflatable play structures will be set up on the existing lawn and terrace. A 16ft. x 24ft. temporary stage will be set up on the dry sand beach landward of the Ordinary High Water Mark and seaward of the dunes as depicted in the attached project description and drawings. The temporary structures will be transported to their location by a 4-wheel drive pickup truck and attached 12ft. trailer. Electrical services will be provided via temporary, portable panels or generator staged on the upland and connected to the existing building, outside of SPA jurisdiction, with bundled cables running out to the beach along approved access locations. Set up of the fireworks launch trailer, lemonade stand, inflatable play structures, and stage will take place on December 31, 2026, with removal immediately after the fireworks

display. In the event of rain or other unforeseen events, set up and removal will occur between December 24, 2026, and January 8, 2027. The approved DNR vehicle access route will be used for the transport of the approved equipment. No unauthorized equipment may be stored on the beach overnight. No dunes or dune vegetation will be disturbed during the transport or set up of any of the structures.

Because the project occurs between May 1st and October 31st, sea turtle nesting season, an individual with a DNR Sea Turtle Cooperators Permit must survey the area prior to the work beginning. All sea turtle nests must be avoided, and no activity may occur within 20ft. of a sea turtle nest.

The Department authorizes the placement of the temporary tents, structures, activities, and placement of a fireworks display as depicted in the attached description and drawings and has no objection to the actions. **No unauthorized equipment, materials or debris may be placed, disposed of, or stored in jurisdictional areas.** Any incidental damage to dunes or dune vegetation will require restoration to be coordinated through this office. This LOP is valid for the above referenced projects. Any change in the use, location, dimensions, or configuration of the approved project, without prior notification and approval from this office could result in revocation of this permission and in the required removal of the related structures.

This LOP does not relieve you from obtaining any other federal, state, or local permits. If you have any further questions or concerns regarding this or any other projects, please feel free to contact Beth Byrnes at (912) 264-7218.

Sincerely,

Doug Haymans
Director

Elizabeth & Josh,

On behalf of Sea Island Acquisition, I respectfully request a Letter of Permission for the following activities at the Sea Island Beach Club:
(Please see Exhibits attached.)

For the events set forth below, all of which will be on the upland, access will be via the existing DNR Approved Beach Access Route.

Equipment required to deliver and assemble the tents include a forklift, a one-ton pickup truck, a 24' enclosed trailer, and/or a flatbed trailer.

Tent materials, including air conditioning equipment, will be delivered on palettes stored on a flatbed trailer.

A forklift will off-load materials and equipment for assembly at the Beach Club Site.

The erection of a Temporary Tent on existing lawns and terraces for the events to take place on the following dates:

Event Type	Start Date	End Date
Group	8/7/2026	12/15/2026
Group/Holiday	12/16/2027	2/6/2027

New Years - The 8'x16' fireworks launch trailer will be set on existing hard-packed sand beach. The trailer will be transported by a 4-wheel drive Jeep and delivered to the beachfront site. (See attached exhibits). Set up will take place 12/31/2026. In the event of rain or other unforeseen events, setup and removal will take place within the dates of 12/24/26 to 1/8/2027. Given vehicle sizes and mobility requirements, the only feasible access to the Beach Club site for the events enumerated above, is along the existing DNR approved access route as illustrated on the attached exhibits. No dunes or dune vegetation will be disturbed.

An 8ft. x 10ft. lemonade stand by Sweet GA Sips and inflatable play structures will be set up on the existing lawn and terrace. A 16ft. x 24ft. temporary stage will be set up on the dry sand beach landward of the Ordinary High Water Mark and seaward of the dunes as depicted in the attached project description and drawings. Electrical services shall be provided via temporary portable panels connected to the existing building.
