MEMORANDUM

TO: Members, Board of Natural Resources

FROM: Doug Haymans

SUBJECT: Briefing on a Proposed Amendment to the Rules of the Georgia Department of Natural Resources, Saltwater Fishing Regulations, Chapter 391-2-4

The Coastal Resources Division is proposing to amend the Rules of the Georgia Department of Natural Resources, Saltwater Fishing Regulations, Chapter 391-2-4. The Secretary of Commerce recently approved Amendment 10 to the South Atlantic Fishery Management Council’s Dolphin Wahoo Fishery Management Plan. The majority of implemented measures affect the commercial fishery in Federal waters, however, one measure affects the recreational sector by decreasing the vessel limit from 60 to 54 fish in Federal waters. The Federal regulations will become effective on May 2, 2022. To alleviate ambiguity for recreational anglers, Coastal Resources Division is proposing changing the daily creel and possession limit for Dolphin to mirror the changes in Federal waters.

- Date, Time, and Place of Board Action Page A-4
- Explanation of the Public Participation Plan Page A-4

**BACKGROUND AND SYNOPSIS OF
PROPOSED AMENDMENTS TO THE RULES OF THE
GEORGIA DEPARTMENT OF NATURAL RESOURCES
COASTAL RESOURCES DIVISION
RELATING TO
SALTWATER FISHING REGULATIONS, CHAPTER 391-2-4**

Background

On April 1, 2022, NOAA Fisheries announced the final rule for Amendment 10 to the South Atlantic Fishery Management Council's Fishery Management Plan for Dolphin Wahoo. The purpose of the amendment is to revise the acceptable biological catch, annual catch limits, sector allocations, accountability measures, and management measures for Dolphin and Wahoo. Specific management measures include commercial trip limits, authorized fishing gear, removing the operator permit requirement for Dolphin and Wahoo, and changing the recreational vessel limit for Dolphin.

Dolphin are highly migratory, exhibit fast growth and are highly productive. Although Dolphin are not considered to be overfished or undergoing overfishing, interest in the recreational harvest of Dolphin has increased over time. Additional concern for the stock was expressed to the Council by Florida anglers who recommended a decrease in recreational catch limits. Rather than implement a Florida-specific reduction, the Council determined that a coast-wide reduction in the vessel limit was appropriate to promote consistency of regulations across the region. Amendment 10 reduces the vessel limit for private vessels and charter boats from 60 to 54 fish.

According to the results of a recent angler satisfaction survey, 26% of Georgia anglers participate in fishing activities that occur between 3 and 200 miles offshore. However, it is unknown what number of that 26% primarily target Dolphin as those anglers are rarely contacted by the Marine Recreational Information Program (MRIP). Estimates of catch produced by MRIP show total catches have ranged from 5 (in 2010) to 1,766 (in 2014) fish over the last 10 years in Georgia.

Purpose

The purpose of the proposed amended rule is to change to daily creel and possession limit for Dolphin landed in Georgia to promote consistency of regulations among states and federal waters and to limit ambiguity in regulations for the recreational angler.

Main Features

The primary feature of the proposed amendment is changing the daily creel and possession limit in the table in paragraph (3)(i) from 60 to 54 to be consistent with federal regulations.

Differences

Enumerated below are the primary differences between the current Rule 391-2-4-.04 and the proposed amended Rule:

- 1) Change the text in paragraph (3)(i) under the Daily Creel and Possession Limit heading to read 10 per person not to exceed 54 per boat.

Date, Time, and Place of Board Action:

Thursday, June 16, 2022, at 2:00 PM at Indian Springs State Park, Flovilla, GA 30216 in the Idlewilde Event Center.

Minimal Public Participation Plan: Amendment to Saltwater Fishing Regulations, Chapter 391-2-4

A minimal public participation plan was selected due to limited targeting of the species, and because the magnitude of change resulting from the proposed amendments should have little to no negative impact on recreational fishermen or fishing-related businesses.

Public Participation Plan

- April 26, 2022 - CRD presents proposed amended Rule 391-2-4-.04 to the Board of Natural Resources, Coastal Committee.
- April 29, 2022 - CRD Public Notices a written comment period advertised through various print media, Gov Delivery and on the CRD website. CRD will also produce an informational video to post on the website.
- May 30, 2022 - Public comment period closes.
- June 16, 2022 - CRD presents final draft of proposed amended Rule, considering public comment, to the Coastal Committee of the Board of Natural Resources for final action.
- Assuming affirmative vote, amended rule filed with Secretary of State such that the rule becomes effective on August 1, 2022.

MEMORANDUM

TO: Board of Natural Resources

FROM: Doug Haymans

SUBJECT: Economic Impact of Proposed Amended Rule on Small Businesses:
Chapter 391-2-4, Saltwater Fishing Regulations

The Administrative Procedures Act requires that during the formation and adoption of any rules attempts shall be made to reduce the economic impact of those rules on small businesses. This applies to businesses that are independently owned and operated, are not dominant in the field and employ 100 employees or less.

The proposal to decrease the vessel limit for Dolphin to be consistent with federal regulations should have no negative impact on small business.
