

GEORGIA DEPARTMENT OF ECONOMIC DEVELOPMENT

PAT WILSON
COMMISSIONER

November 5, 2020

ATTN: Ms. Deb Barreiro
Georgia Department of Natural Resources
Coastal Resources Division
One Conservation Way
Suite 300
Brunswick, GA 31520-8687

Ms. Barreiro,

We write to offer strong support for the construction and maintenance of a deep-water berth at the SeaPoint Marine Terminal, as described in the application submitted by Sulco LLC. A new berth at SeaPoint will be a critical addition to the logistics and supply chain stronghold in Savannah, Georgia.

Georgia and the Savannah area offer a variety of site locations that suit many different end users; however, there are industrial operations that specifically rely on the movement of raw and finished material by ocean-going vessel and would benefit from a closely located production facility, like the design being considered at SeaPoint's multi-use facility.

Few sites share this unique confluence of water and land resources alongside existing inland infrastructure including Class I rail and highway access, making a deep-water berth at SeaPoint critical for ensuring the Southeastern US region, and in many cases our nation, is a competitive site location for companies with these specific logistic needs.

These operations directly translate into high-wage, high-skill jobs for the region. A University of Georgia (UGA) analysis estimates that the site, located in a distressed Qualified Federal Opportunity Zone identified by the federal government as a priority for economic development, will generate 1,703 direct jobs with an average income of over \$58,000.

We are pleased to support this innovative project as described in the application submitted by Sulfoo, LLC. Should you need additional information, please feel free to contact me.

Sincerely,

A handwritten signature in blue ink, appearing to read 'Padgett Wilson', with a stylized, cursive script.

Padgett Wilson, Commissioner
Georgia Department of Economic Development
