Clam Creek Beach Advisory Issued

GLYNN COUNTY, GA – Clam Creek Beach (from Clam Creek to the old north picnic area) on Jekyll Island has been placed under advisory by the Glynn County Health Department. This advisory is only for the area(s) specified above and does not impact any other beaches on the island. This beach water advisory is to alert the public of a possible risk of illness associated with water contact but does not mean the beach is closed.

Routine water quality tests from samples taken June 4 at this location showed a high level of enterococci bacteria which increase the risk of gastrointestinal illness in swimmers.

The Glynn County Health Department recommends you do not swim or wade in the water in the area(s) under advisory. Fish and other seafood caught from this area should be thoroughly washed with fresh water and thoroughly cooked before eating as should fish or seafood caught from any waters.

The area will be retested on June 7 and the advisory will be lifted when tests show the bacteria levels meet the Environmental Protection Agency's recommended standards.
