

**Georgia Department of Natural Resources Incident
Action Plan**

Chronic Wasting Disease (CWD) Detected in Georgia

GEORGIA

DEPARTMENT OF NATURAL RESOURCES

Incident Name

Georgia Chronic Wasting Disease (CWD)

Operational Period #

20

Op Period Dates

10-11-2025 to 10-18-2025

Distributed To

Georgia Department of Natural Resources

(For Internal Use Only)

Incident Summary Statement

On January 15, 2025, the Georgia Department of Natural Resources (DNR) was notified of an initial reactor screening test for a Chronic Wasting Disease (CWD) sample in a hunter-killed free-ranging white-tailed deer harvested on the Berrien-Lanier county line in South-Central Georgia. The sample was then sent to the National Veterinary Services Laboratory (NVSL) for confirmation. DNR received confirmation of positive status on January 22, 2025. On January 23, DNR interviewed the hunter and confirmed the harvest location, and subsequently issued a press release confirming the first case of CWD in Georgia. On January 24, DNR held a press release to answer questions and give further details on the next steps that will be taken. A public meeting was held in the CMA on August 21, 2025. A two-county CWD Management Area (CMA) was established around the positive sample location, as well as a one-mile intensive sampling zone around the positive sample location. On 4/4, DNR received notification of initial reactor test on a deer collected near the first positive. NVSL confirmation was received 4/18. On 9/30, DNR received notification of initial reactor test on a clinical deer collected in Lanier County, approximately 5 miles south of the index case. NVSL confirmation was received 10/9. This positive is within 5 miles of Lowndes County, therefore Lowndes was added to the CMA. Cluster Sampling is underway. Thirteen drop-off freezer locations have been identified. Thirty-nine processors or taxidermists have been identified as sampling locations. All WRD-GM region offices are established as sampling locations. Sampling for the 2025-26 hunting season is in progress. Fifty-six (56) samples have been collected in the CMA with 3 positives, 31 not detected, and 22 pending.

Operational Period Objectives

Incident Name Georgia Chronic Wasting Disease (CWD)

Operational Period 20

Operational Period Dates 10-11-2025 to 10-18-2025

CWD Management Zone Map

Operational Period Objectives

Incident Name	Georgia Chronic Wasting Disease (CWD)
Operational Period	20
Operational Period Dates	10-11-2025 to 10-18-2025

Objective 1: Collect and process samples statewide

Objective 2: Maintain and continue to establish CWD sampling locations statewide

Objective 3: Complete internal education for front line staff prior to deer season.

Objective 4: Expand CWD testing capacity at the UGA Athens Veterinary Diagnostic Lab.

Objective 5: Expand CWD monitoring through environmental surveillance.

Objective 6: Assess human dimensions of risk factors in the CMA and identify mitigation recommendations.

	Assignment List			
Incident Name	Georgia Chronic Wasting Disease (CWD)			
Operational Period	20			
Operational Period Dates	10-11-2025 to 10-18-2025			
Operations Section Chief	Kevin Rose			
Branch Director				
Divison/Group Supervisor				
Resoures Assigned				
Resource Identifier	Leader	# of Persons	Contact	Reporting Location
Work Assignments				
	<u>Objective 1</u>			
Alley Philson/contractor	Continue to coordinate WRD staff and contractors to collect samples in and around CMA			
Region Staff	Continue to coordinate with processors and taxidermists in region to collect samples			
Region Staff	Continue to implement statewide surveillance per protocol			
Kevin Rose	Establish contract with ABAC TWS to support sample collection			
	<u>Objective 2</u>			
Alley Philson	Continue working with local government, municipal, taxidermists and processors to set up freezers where hunters can leave deer heads for testing. Sites must include power, water, and paved surface. Identify Game Management staff responsible for establishing additional sampling locations within each region.			
Region Supervisors				
Region Staff				
Kevin Rose	Maintain existing and establish additional sampling locations within each region.			
Kevin Rose	Maintain up-to-date interactive sample location map for public			
Greg Nelms/Drew Zellner	Continue to establish sample processing station at Grand Bay WMA check station by installing incinerator, canopy cover for incinerator, identify or create covered and paved work area, order 4			
	<u>Objective 3</u>			
Charlie Killmaster	Schedule virtual biologist CWD training			
	<u>Objective 4</u>			
Charlie Killmaster	Update contract with UGA-AVDL to purchase additional lab equipment for ELISA and RT-QuIC and increase tech staff.			
Dr. Maestas/ Rebecca Kresin	Continue working with VetView to create database API to automate CWD test notification system.			
Charlie Killmaster	Explore opportunities with Tifton AVDL to purchase ELISA equipment for 2026-27 season.			
	<u>Objective 5</u>			
Charlie Killmaster/ Alley Philson	Continue to conduct environmental surveillance on deer facilities inside CMA.			
	<u>Objective 6</u>			
Charlie Killmaster/ Matt Goode	Continue coordination with UGA to implement research project			
Charlie Killmaster/ Kaitlin Goode	Develop and implement educational campaign on CWD risk factors and management.

Incident Accomplishments

Field Response

The Operations team has been contacting landowners within a 1-mile radius of the positive sample site to inform them of the CWD positive sample, and to work with them to gain additional samples to determine CWD prevalence via landowner permit. Field staff have also collected samples from processor and taxidermists, road-killed deer, and sick deer within the CMA.

Table 1. Summary of CWD related field response by DNR Staff since start of incident

Contact Type	Totals
Deer Depredation Permit Holders Contacted	16
Landowner Permits Issued	9
Total Samples Collected in CMA	56

CWD Freezer Locations

Business Name	Address	City	County
Banks Lake Outdoors	307 Ga-122	Lakeland	Lanier
Lanier Forestry Commission	Next to 168 N Brantley St	Lakeland	Lanier
Hunt's Deer Processing	79 Bolling Ln	Ray City	Lanier
Berrien Forestry Commission	13836 Co Rd 129	Nashville	Berrien
Ford Taxidermy	520 Jn Ford Rd	Nashville	Berrien
Owen Farm Deer Processing	366 Junebug Lane	Alapaha	Berrien
Enigma Fire Department	324 S Main St	Enigma	Berrien
Tattooed Butcher 'Wild Game Cuts' LLC	969 Fire Tower Road	Enigma	Berrien
Henderson deer processing	256 Corbitt Rd	Homerville	Clinch
Lowndes County Forestry Unit	3011 US-84	Valdosta	Lowndes
K&K Deer Processing	6749 Good Hope Rd	Naylor	Lowndes
Bullard Deer Processing	6980 Val Del Road	Adel	Cook
Anchor Outdoors	607 West Central Ave	Lenox	Cook

Completed Actions

Sampling contractor hired for collecting samples from crop permit holders.

Freezers, supplies, and decals for sampling sites recieved.

Statewide deer carcass disposal rule implemented.

Contracted with UGA to develop a research project to assess CWD risk factors before and after educational campaign.

Secured necessary funds to implement FY26 to fund disease management and monitoring.

Completed and distributed fawn rehabber guidance on handling fawns from CMA.

Scheduled in person (Aug 21) and virtual (Aug 26) meetings for taxidermists and processors.

Scheduled in person public meeting in CMA for Aug 21.

Scheduled virtual meeting for DNR staff for Aug 14.

Statewide CWD sampling progress dashboard for public created.

Developed talking points for Game Wardens and WRD staff.

Created online dashboard for public to look up CWD test results.

Deer Program staff attended Region LED meetings for CWD Q&A.

Created online interactive map of sampling locations for website

Created CWD website/QR code business cards and distribute to front line staff

Created informational handouts for taxidermists and processors.

Created informational placards for hunters that businesses can post.

In person public meeting for taxidermists and processors in and around CMA held on Aug 21.

In person meeting for general public in and around CMA held Aug 21

Created plan to monitor sampling sites, transport heads to Grand Bay, and transport samples to lab.

Statewide taxidermists and processors virtual meeting held Aug 26

CMA Sampling Sites Schedule

Friday through Monday - Collect heads from freezers/taxidermists/processors and thaw

Monday - Thaw heads for sampling

Tuesday - Pull samples, incinerate heads

Wednesday - Data entry for Survey123, prepare samples for transport

Thursday - Transport samples to lab

Communications Accomplishments

[Press Release outlining confirmation of first positive case of CWD in Georgia 01/23/2025](#)

[Wildlife Resources Division's Updated CWD Webpage](#)

Board of Natural Resources updated 01/24/2025

Press Conference 01/24/2025

Social Media Posts created & shared by DNR-WRD and GA DNR Accounts

Staff Guidance and FAQs created and shared with all DNR staff

CWD informational presentation & Q&A presented to DNR staff 1/24/2025

[Georgia House Game, Fish and Parks Committee Briefing 1/27/2025](#)

Held 4 Public Information Sessions:

Adel, Ga 2/4/2025 - 45 attendees

[Virtual 2/6/2025 - approximately 10,000 views as of 2/11/25](#)

Lakeland, GA 2/8/2025 - 33 attendees

Valdosta, GA 2/8/2025 - 7 attendees

Press Release confirming 2nd CWD positive deer 4/22/25

Held processor and taxidermist meeting in CMA 8/21/2025 - 20 attendees

Held public information session in CMA 8/21/2025 - 33 attendees

Held virtual taxidermist and processor meeting 8/26/25

Archery season press release 9/4/25

Executive Orders/Regulations
Statewide deer carcass disposal rule implemented. No regulation changes required or proposed for CMA counties.

Safety Message

MAJOR HAZARDS AND RISKS COLLECTING CWD SAMPLES:

- **GENERAL HEALTH**
- **SITUATIONAL AWARENESS**
- **SAFETY BEFORE WORKING**
- **SAFETY WHILE WORKING**
- **SAFETY WHILE TRAVELING**

GENERAL HEALTH

Avoid accidental contamination

Always carry and use water, soap, and/or hand sanitizer to clean hands after collecting samples

Monitor your fatigue level—risk of mistakes and contamination increases with tiredness.

Clean area and tools with dilute bleach solution (40%) when finished

SITUATIONAL AWARENESS

Assume all deer are contaminated – deer carry multiple diseases harmful to humans

Do not cut into a heavily bloated or decomposed deer

Exercise caution when using sharp blades or tools.

Stay alert and cautious when working near roadways

Collect samples outside or in a well-ventilated room

SAFETY BEFORE WORKING

Confirm you have all necessary Personal Protective Equipment (PPE) before starting

Check that all PPE is functional and in good condition

SAFETY WHILE WORKING

Carry appropriate PPE for all scenarios (roadside sampling, carcass handling, blade use)

Ensure safe visibility when collecting samples along roadways:

 If the carcass is near a curve, park in a visible, straight section and walk to the location.

Use vehicle flashers when parked roadside

Wear high-visibility clothing when working near traffic.

Report any incidents or accidental exposure to your supervisor immediately.

SAFETY WHILE TRAVELING

Use extra caution at night—visibility is reduced, and sight distance is limited.

Inform someone of your destination and expected return time.

Verify your planned route is open, safe, and accessible.

Watch out for distracted drivers and moving traffic.

Park only in safe, visible locations—avoid curves or blind spots.

Always wear your seatbelt.

REQUIRED PERSONAL PROTECTIVE EQUIPMENT (PPE)

High-visibility gear: Vest and/or shirt when near roadways.

Eye protection: Safety glasses or goggles during sample collection.

Face Mask/shield: Disposable surgical mask or face shield to protect from splash and aerosolized particles

Gloves (Disposable): Nitrile gloves for handling biological material – double glove. Remove outer glove to provide a clean hand to take notes/pictures and to reduce contamination of equipment

Gloves (Utility): Leather gloves for handling tools or around sharp broken bones

Sharp Blade: Dull blades are more likely to cut you, replace/sharpen often

Blade removing tool: Leatherman, pliers, needle holder

Sharps Container: For proper disposal of used or contaminated blades.

Face Mask/shield: Disposable surgical mask or face shield to protect from splash and aerosolized particles

Forceps: Grab samples with forceps and cut, holding with fingers increases risk of getting cut
